### ***The Initial Stage:***

At an initial meeting the requirements of the school were discussed and so was the limited budget that was available to do the work. We agreed that we would work within the constraints of the budget to deliver as much as possible.

### ***The Installation Process:***

On the day of installation two engineers were on site, looking at the best possible route to run the cabling. The schools requirements were to add a further 5 telephone extension points around the school and to minimise any possible disruption whilst the work was taking place.

The engineers were also mindful of the restricted budget and focussed on ways to achieve what was required as cost effectively as possible.

### ***The Result:***

The work was completed in one day, everything the school required was delivered and better still at the end of the work we were able to let them know that we could complete the work for less than they had agreed to spend.

The new telephones means they have much better access to contact members of staff around the school. This is beneficial for every day matters and also gives immediate access to teachers around the school should a more serious situation arise.

### ***Recommendation:***

*We are extremely happy with the recent work carried out by 1<sup>st</sup> Call, we were working to a very tight budget on this project, and I can say that after installation of the recent work carried out we have some funds left to spend on other important items that the school needs.*

*Yeadon Westfield School are more than happy to recommend the products and services of 1<sup>st</sup> Call, the professional manner and the quality of workmanship was outstanding.*

*Debra Thornton - School Business Manager*
